

Vanma

HANDLE LOCK

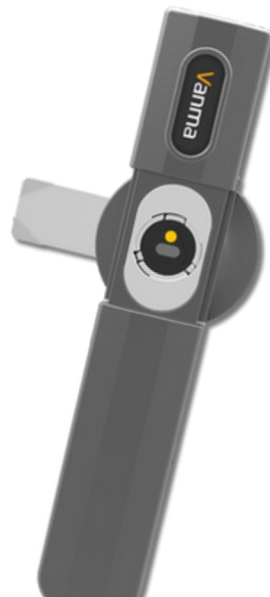

WM-2000C-B01

System Description

The convenience of remote management and high-level security throughout your business anytime and from anywhere. Reducing key control problems, smart keys are programmed for individual users' access rights. Each lock and key stores every access attempt, allowing managers to view audit trail of who has entered or attempted to enter a particular location.

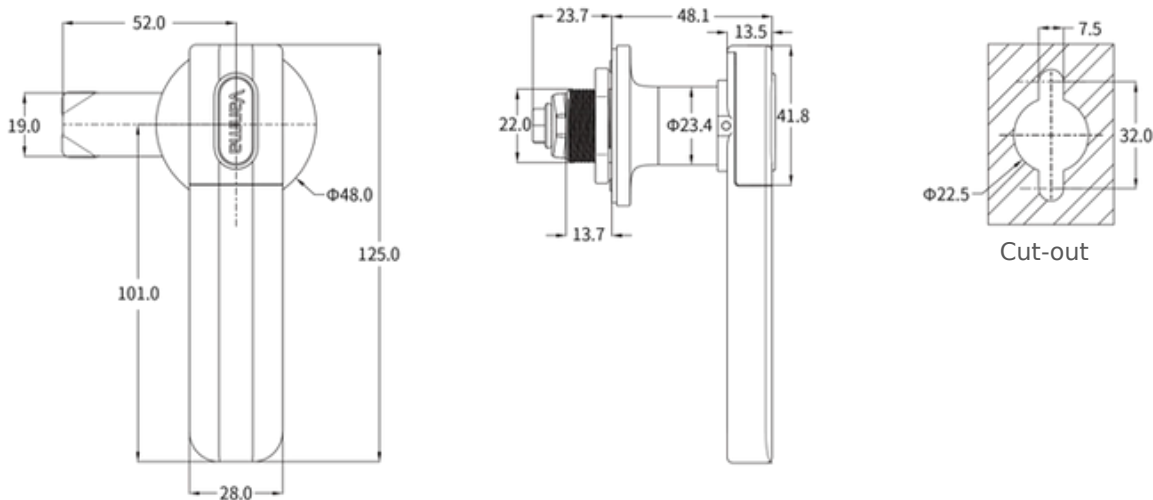

Feature

- Programmable electromechaniclock for Vanma® locking system
- No batteries or external energy source required for the lock
- All Vanma® locks and Vanma® keys are mechanically identical
- Powerful and secure AES256 encryption for common lock and key authentication
- Programmable lock opens with Vanma® keys
- Log memory for openings and opening attempts
- Blacklist for individual lost keys
- Access group list for key accesses
- Updatable firmware
